

## K14 Career Pathways workgroup meeting summary 5.24.22

### Options After High School survey:

- The group reviewed the recommendations for [Region Level Interventions](#) focused on marketing and professional development. These regional interventions are not meant to duplicate efforts at the local high school and college level, but rather support, fill in gaps and leverage what the high schools and colleges are already doing. The recommendations for local college, K12 district and local K12 school site level interventions are being compiled and will be reviewed at the June meeting.
- The raw data of the survey is available, by K12 district. Find your data at <https://bit.ly/2021-22-hs-opts-data>. A K12 district-level regional dashboard with a user prompt guide will be available at our next K14 meeting in June.
- If you would like to dive deeper into your K12 data in early fall with a facilitated intensive session led by WestEd and the Regional Consortium, please email [heather.cavazos@gcccd.edu](mailto:heather.cavazos@gcccd.edu).
