TEAM PLANNING AND REFLECTION

What have we heard today that would be most useful to apply to change efforts on our campus?

What ideas and opportunities are there to explore moving forward in each of the three areas: comprehensive intake, differentiated orientation, and career before education planning?

What are our next steps and who will follow up?

TEAM PLANNING AND REFLECTION

What else do we need (e.g., professional development, access to resources)?

When, what, and how will you communicate with your colleagues who could not be here today and/or other stakeholders at your campus?

What questions do we still have and how will we get the answers?
