Process Demonstration for Work-based Learning

The intent of this presentation is to demonstrate established work-based learning processes developed at each college. It is important to establish functionality of WBL processes before receiving any additional funding from the region.

1. Colleges will receive a series of prompts/scenarios to demonstrate the processes they have developed for their campuses
   a. Each map or significant step in the map may have its own scenario
2. The demonstration should be a high level, visual representation of the processes
   a. Colleges may choose any technology they are comfortable with to display processes via Zoom, including PowerPoint, Canvas, Google docs, Zoom Whiteboard, etc.
   b. Be prepared to highlight key stages of the process.
   c. How would you explain the process to someone who does not have your level of experience or background, a new faculty or someone who is taking over your position?
3. Colleges should use the diagnostic questions provided to highlight key points in their presentations
4. The purpose of this demonstration is to show how steps are being taken to establish a framework that is transparent and understood by staff, faculty and students
5. The intent is for colleges to share these presentations with each other, possibly at the WG4 Meeting, COP, or other designated forum for feedback and questions
