

Using the Options After High School Data Dashboard to Explore Interventions

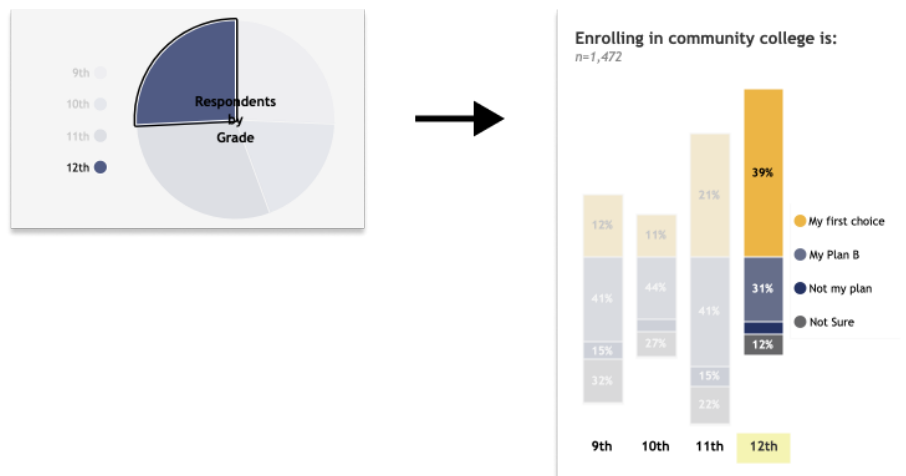

The Options Dashboard allows you to look at data from multiple perspectives—by grade, career area, or any number of combinations of factors. Below are screenshots to help you start exploring the data and ways they might suggest various interventions.

Variations by Grade Level

9th Grade

12th Grade

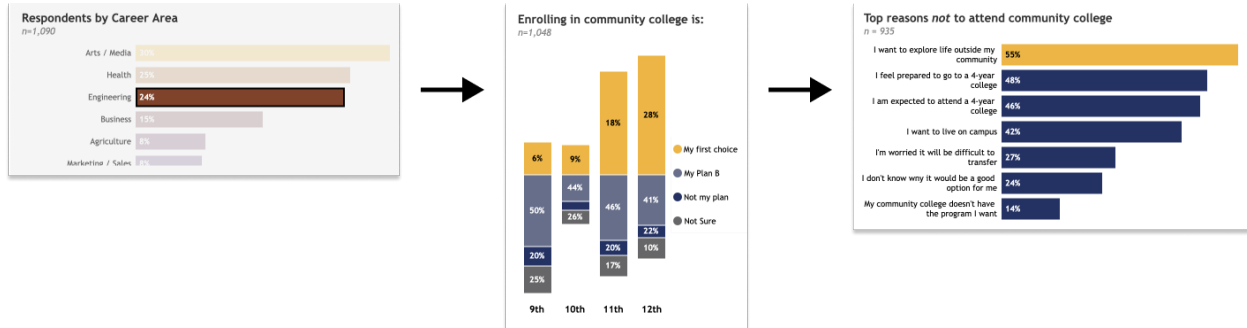

Prompts for discussion:

- 1) What do data from these two grade levels suggest?
- 2) What might this suggest about the kinds of communications that might be appropriate for each group?

Variations by Career Area

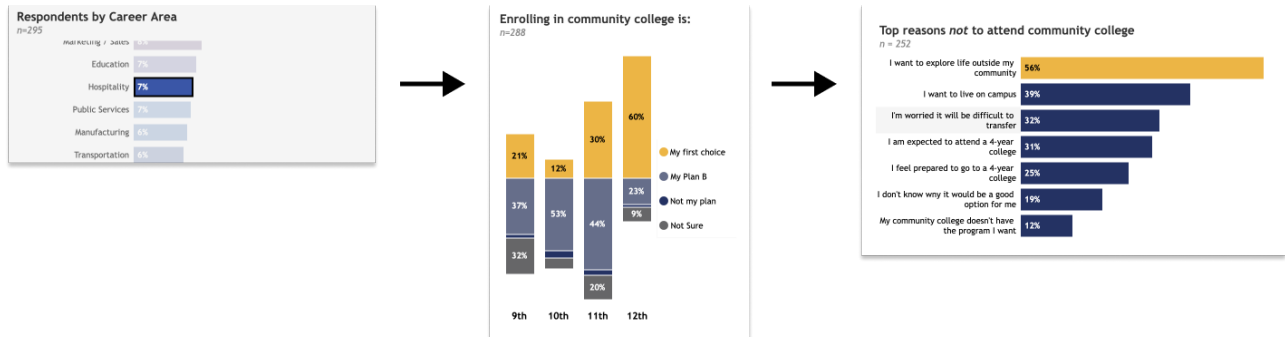

Engineering

Prompts for discussion:

- 1) For Engineering students, what is the primary reason, besides “Exploring life outside my community”, for not wanting to attend community college?
- 2) Given that by 12th grade, many Engineering students do want to attend community college, what can you tell them about this option?
 - a) If they want to be able to transfer, to whom should they be connected at the college?

Hospitality

Prompts for discussion:

- 1) For Hospitality students, what is the primary reason, besides “Exploring life outside my community”, for not wanting to attend community college?
- 2) Given that by 12th grade, most Hospitality students do want to attend community college, what can you tell them about this option?
 - a) To make sure they enroll successfully, to whom should they be connected at the college?
